

INTERNSHIP RECRUITMENT ADVERTISEMENT: DOUBLE IMPACT TECH & SOCIAL WANTED!

Position: Fullstack/Frontend/Backend Application Developer (Intern M/F/X)

Company: **JUSTELLIA**

Contract: Internship agreement

Duration: Six months (the ideal length of time to make a real impact!)

Where? Paris, Remote working.

Start date: Immediately or according to your availability.

Who are we?

Justellia is a **very, very young company** with a social impact mission, proud to be part of the **Legal Tech** sector. Our baby is not a gadget, but a vital application that contributes to **the financial and legal security of our most vulnerable citizens** (protection of adults under guardianship/curatorship).

Our mission is simple: to use the power of technology to serve humanity. To reinforce this mission, we are opening **TWO internship positions!**

Your mission: to become a Tech Pillar of Justellia!

Supported by a team that loves to share its knowledge, you will actively participate in the construction, development and maintenance of Justellia. **You won't be making coffee, you'll be writing code that matters!**

Your role is **crucial**, as you will be developing features that will make a real difference.

What you will achieve (expect to be surprised!):

Domain	Key Missions	The Stack (The cream of the crop)
Frontend	* Design and implement intuitive and effective features. * Optimise usability and performance for our users (who deserve the best).	React and Mantine UI (for modern interfaces).
Backend	* Design and development of robust and scalable APIs. * Management of sensitive data and optimisation of queries.	AdonisJS, Inertia and PostgreSQL (for a high-quality architecture).
Fullstack	* The King/Queen's choice: juggling between the interface and the core of the application.	

The profiles we dream of welcoming

We are looking for **two brilliant and committed minds** who want to give meaning to their internships.

- ☐ **Education:** Student in Bac+3 to Bac+5 (Computer Science, Engineering School, post-core curriculum at École 42 or equivalent).
- ☐ **Languages in your blood:** Strong expertise or a consuming passion for Javascript and Typescript.
- ☐ **Social appetite:** This is non-negotiable! You must have a genuine appetite for protecting our most vulnerable citizens. Your commitment is what drives us.
- ☐ **That little something extra (the 'five-legged sheep' factor):** A keen interest in one (or more!) of the following areas:
 - o **Cybersecurity** (because our data is sacred).
 - o **Docker** (for precise containerisation).
 - o **Ansible** (for the automation of our deployments).
- ☐ **Interpersonal Skills (Your Superpowers):** Autonomy (even though we are here for you), rigour, organisational skills and endless technical curiosity.

Why is Justellia your springboard?

1. **Mission & Meaning:** Give your Legal Tech internship a noble and concrete meaning.
2. **Intensive Learning:** A complex and stimulating project, the assurance of rapid skill development, supervised by professionals.
3. **Professional Equipment:** Computer and necessary equipment provided from day one.
4. **Inclusive Culture:** At Justellia, we are firmly committed to diversity and inclusion. We encourage all applications (M/F/X) and value the richness of different profiles and backgrounds.
5. **Your Intern Benefits:**
 - o Remuneration paid in accordance with current legislation.
 - o Reimbursement of public transport costs (50%).
 - o Meal vouchers or packed lunches to recharge your batteries.

Ready to code for a better world?

Are you that rare gem who doesn't (yet) realise their worth and thinks we're little tech geniuses? Come and code with us!

Send us:

- ☐ Your CV (the first interview will be conducted by telephone).
- ☐ Your cover letter (explaining your motivation for our social mission!).

Application email: candidature@justellia.fr
